# COCONUT

## COCO FIBER

Coconut trees have many benefits in meeting various needs. In addition, coconut fiber waste can be converted into cocofiber (coconut fruit fiber) which is used to make mattresses, car seats, cocomess, and wiremess.

Packing Material : Bonded material  
 Netto : 25 kg  
 Production Capacity : 50 Tons per month

## COCOMESH

Cocomesh adalah jaring sabut kelapa yang bagus guna membantu proses reklamasi tambang hutan, bahkan pantai. Sabut kelapa ini mempunyai sifat bahan sabut yang mampu menyimpan air dalam waktu lama.

Packaging : Roll  
 Dimension : 2x2, 3x3, 4x4  
 length per Roll : 25 M according to request  
 Production Capacity : As Requested

## VIRGIN COCONUT OIL

Coconut oil is a vegetable oil extracted from the flesh of the coconut fruit. Based on the extraction technique, coconut oil can be grouped into three types: Virgin Coconut Oil, Non-RBD Coconut Oil, and RBD Coconut Oil.

Packing Material : Plastic Bottle  
 Netto : 500g, 1000g  
 Capacity per box : 12 pcs  
 Weight per box : 6,3 kg, 12,5 kg  
 Cardboard material : Cardboard

## VIRGIN COCONUT OIL

Packing Material : Pouch, Bulky  
 Netto : 500g, 1000g, 25kg (Bulky)  
 Capacity per box : 12 pcs  
 Weight per box : 6,3 kg, 12,5 kg  
 Cardboard material : Cardboard

# KONJAC

## Amorphophallus muelleri Helathy Food

Konjac, Konyaku is a type of root plant belonging to the genus Amorphophallus which grows in warm to tropical subtropical regions such as East Asia, Japan, southern China to Indonesia. Other names in foreign languages are konjac, konjaku, devil's tongue, or elephant foot yam. Konjac as a substitute for carbohydrates is increasingly popular because it has very low calories and can be processed using various methods or dishes.

# BENENG TARO

## Colocasia Esculentum

**Beneng taro** is different from other taro. Taro beneng tubers have long and large stems, and grow above the ground. Due to its large size, beneng taro has the potential to be processed into flour. Beneng taro flour is used as a healthy alternative food, has low calories so it is safe for consumption by people with obesity or diabetes. Meanwhile, beneng taro leaves are used as a substitute for tobacco for herbal cigarette products.

Beneng taro leaves have wide dimensions, have the same character as tobacco, so that beneng taro leaves can be used as an alternative to tobacco. with zero nicotine content, beneng taro leaves are believed to be raw materials for herbal and healthy cigarettes. Currently beneng tobacco products have been exported to many countries such as Australia, New Zealand, Europe, China, and Middle Eastern countries.

- Packing Material : Plastic Bag
- Netto : 5kg
- Capacity per box : 2 pcs per Carton
- Weight per box : 10,3 kg
- Cardboard material : Duplex 400 gr full colour

### Beneng Tobacco

Konjac tubers are usually made into flour, noodles or rice-shaped grains. Apart from being a substitute for rice, the use of porang is used for the manufacture of cosmetics, glue, as well as raw materials for chemical laboratories and medicines

- Packing Material : Plastic Pouch
- Netto : 500g, 1000g, 10kg, 25kg
- Taste quality : 9,0
- Capacity per box : 20 pcs per Carton
- Weight per box : 6,3 kg, 10,4 kg
- Cardboard material : Duplex 400 gr full colour

# CARICA FRUIT

## Vasconcellea pubescens

Mountain papaya, Papaya Dieng or Karika is a papaya relative that likes wet highland conditions, 1,500–3,000 m above sea level. In the Wonosobo region this plant is commonly called Carica. Its area of origin is the Andean highlands. Dieng papaya is a source of calcium, sugar, vitamins A and C. Dieng papaya contains a lot of essential oils and is a derivative of fatty acids. Most are 3-hydroxyester compounds, which are also found in several other tropical plants such as pineapple, mango, gooseberry, and tamarillo

The Carica products that we produce are packaged in two packages, namely bottles and mini cups. With cardboard boxes that are adjusted to the amount of each package

# Rice Products

Based on the book Indonesia: Peoples and Histories written by Jean Gelman Taylor, Indonesia has been cultivating rice since 3000 BC or in conjunction with the rice field system developed in China.

In addition to the influence of the culture spread by Chinese traders, rice which is now used as Indonesia's staple food cannot be separated from Indonesia's geographical conditions.

In fact, because of the importance of rice, the people of Indonesia have nicknamed rice as a gift given by Dewi Sri or a rice goddess believed by the ancient Javanese and Balinese.

# STICKY RICE

## Glutinous Rice

Glutinous rice (*Oryza sativa* var. *glutinosa*) or pulut is a type of rice that mainly grows in Southeast Asia and eastern Asia.

### Use in food

Glutinous rice is used in a variety of recipes in Southeast Asia and East Asia. In Indonesia, glutinous rice is used as a raw material for snacks such as cakes, accompaniments to dishes, mixed bread, and other secondary foods. So that makes sticky rice a support for food needs in Indonesia.
